

Podortho™ Foot Specialist Foot and Lower Limb Assessment

Disclaimer: Subjective and Objective Assessments differ from that of a Medical Diagnosis (MD). Identifying characteristics through subjective and objective assessments does not suggest that the PodOrtho Foot Specialist is providing a MD as only those practitioners authorized through the RHPA are permitted to medically diagnose as this is a controlled act. Identifying and documenting when the client has been medically diagnosed by their Primary Care Provider (PCP) is permitted in order for the treating healthcare practitioner to provide best practice(s).
